POST
/payments/business/account/{accountId}/fasterpayment
Commercial: Request Faster Payment by AccountID

Faster Payments allows customers to post Payment to the accounting system for nightly batch processing so that it can be processed faster. Only applicable for International clients.

Parameters

Type	Name	Description	Schema
path	**accountId** *required*	Unique identifier generated by the system when an account is opened. One or more card numbers may be associated with an account, however, the data returned will be based on the primary card account only. For TS1, pass card number instead of accountId.	string
